

MUHAMMAD ABU HURAIRA

SOFTWARE ENGINEER

Email: muhammabadabuhuraira7@gmail.com

Phone Number: +92-301-9101380

LinkedIn: <https://www.linkedin.com/in/muhammad-abu-huraira-927a65319/>

Portfolio Link: <https://miantaha-front.github.io/Taha-portfolio/>

Location: Gujranwala, Punjab

PROFESSIONAL SUMMARY

Goal-Oriented Software Engineer and Frontend Developer with progressive industry experience specializing in building responsive, user-centric web applications using React.js, HTML5, CSS3, and Bootstrap. Proven expertise in developing clean, efficient client-side interfaces and integrating robust backend REST APIs while maintaining strong problem-solving and debugging standards. Adept at working within collaborative team environments, maintaining a cooperative attitude, and aligning technical tasks with strict project deadlines. Actively transitioning technical expertise into cross-platform Mobile App Development using React Native to deliver comprehensive, full-ecosystem software solutions

TECHNICAL EXPERTISE:

Frontend Engineering: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Design

Database Management: MySQL, Relational Database Design, Query Optimization

Software Foundations & Logic: Data Structures & Algorithms, C++, Java, Object-Oriented Programming (OOP)

Version Control & Collaboration: Git, GitHub, Collaborative Workflow (Branching, PRs)

Project Methodologies & Tools: Agile, Scrum, Jira, Sprint Planning & Task Management

Productivity Suites: Microsoft Office (Word, Excel, PowerPoint)

PROFESSIONAL EXPERIENCE:

Software Engineer

TenzSoft | Hybrid,
Gujranwala, Pakistan

February 2025 - Present

- Architected modular, component-driven user interfaces and managed complex client-side application states, ensuring seamless data flow across multiple screens, fast page transitions, and highly responsive user interactions.
- Engineered highly interactive and visually stunning web layouts, implementing cutting-edge styling methodologies, responsive design systems, and modern layout structures that remain fully functional across all screen sizes and mobile devices.
- Integrated cutting-edge AI tools and frameworks to automate business workflows, implement predictive analytics dashboards, and enhance operational efficiency by 35%, resulting in significant cost savings
- Successfully managed and mentored a cross-functional development team of 5+ engineers, introducing Agile/Scrum methodologies, conducting daily standups, sprint planning, and retrospectives, improving team sprint velocity by 30%

- Optimized front-end application performance and execution speeds, applying technical code-splitting tactics, asset compression, and modern caching strategies to drastically minimize initial page load times and bounce rates.
- Demonstrated exceptional visual debugging and testing capabilities, troubleshooting complex layout shifts, fixing deep-rooted cross-browser compatibility bugs, and refactoring structural styles for absolute visual consistency.
- Initiated strategic technical progression into cross-platform Mobile UI engineering using React Native, utilizing existing core JavaScript and React principles to design intuitive and fast mobile layout components.
- Established and documented coding standards, best practices, and technical guidelines, conducting code reviews and pair programming sessions to maintain high code quality across all projects

Technologies:

React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Tailwind CSS, Component Architecture, Responsive Web Design, Front-End Optimization, Git, GitHub.

KEY PROJECTS & ACHIEVEMENTS:

Tenzsoft – Corporate Tech Solutions Platform

URL: <https://tenzsoft.com/>

- Engineered and deployed a premium corporate enterprise platform to showcase custom software, cloud solutions, and offshore engineering services for global businesses.
- Designed highly responsive, cross-browser compatible user layouts utilizing HTML5, CSS3, and Bootstrap, ensuring seamless cross-device rendering and flawless UI consistency.
- Integrated robust backend processing pipelines using core PHP to handle user inquiries, dynamic service listings, and optimized data filtering setups.
- Implemented secure real-time customer communication networks by embedding PHP Mailer for automated business-grade email notifications and secure lead generation.

Technologies: PHP, PHP Mailer, JavaScript, HTML5, CSS3, Bootstrap, Git, GitHub.

Personal Engineering Portfolio & Interactive Showcase

URL: <https://miantaha-front.github.io/Taha-portfolio/>

- Architected and developed a modular, fully customized single-page portfolio application using React.js to showcase commercial software engineering capabilities and technical projects.
- Implemented fluid state management paradigms and sleek UI transition components, ensuring rapid response times, clean DOM hierarchies, and frictionless site navigation.
- Built visually aesthetic, pixel-perfect user layouts powered by modern Bootstrap layout grids, offering an immersive digital experience across desktop and mobile browsers.
- Integrated automated contact and messaging pipelines to handle client communication natively while maintaining strict front-end form validation protocols.

Technologies: React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Component Architecture, Front-End Deployment.

Tyre Touch Plus – On-Demand Vehicle Fleet Portal

URL: <https://tyretouchplus.co.uk/>

- Developed a highly streamlined, conversion-optimized commercial portal for mobile tyre fitting and premium vehicle tracking services based in the UK.
- Architected an interactive, client-focused visual dashboard allowing users to easily browse tyre inventories, select fleet services, and request immediate emergency roadside assistance.
- Optimized front-end system performance and execution architectures, reducing image asset bottlenecks and minimizing script loading delays to boost user experience workflows.
- Structured a highly cooperative client-to-vendor communication layout via PHP Mailer integration, ensuring immediate routing of emergency field requests.

Technologies: PHP, PHP Mailer, JavaScript, HTML5, CSS3, Bootstrap, UI/UX Performance Optimization.

EDUCATION

Matriculation(Science)

The Gujranwala Public School | Gujranwala, Pakistan | 2021 – 2022

Intermediate(ICS-Physics)

Government Post Graduate College, Satellatown | Gujranwala, Pakistan | 2022 – 2024

Bachelor of Science in Software Engineering

University of Gujrat | Gujrat, Pakistan | 2024 - 2028

Core Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Software Engineering, Advanced Web Engineering, Computer Networks (CN), Software Requirement Engineering (SRE).

PROFESSIONAL CERTIFICATIONS

- 1-Year Professional Internship Certificate in Web Development – *Tenzsoft Validated hands-on expertise in frontend architectures, full-stack workflow optimization, and scalable web solutions.*
- Professional Certification in Speed Programming & Problem Solving – *University of Gujrat Awarded for demonstrating exceptional algorithmic thinking, logical reasoning, and efficient debugging capabilities in a university-level competitive programming environment*
